

METHOD FOR ENTERING TEXT

ABSTRACT OF THE DISCLOSURE

In a method of entering text into a device
a first character input is provided that is
5 indicative of a first character of a text entry.
Next, a vocalization of the text entry is captured. A
probable word candidate is then identified for a
first word of the vocalization based upon the first
character input and an analysis of the vocalization.
10 Finally, the probable word candidate is displayed for
a user.
